ABOUT ME

As a seasoned Web Developer with over 3 years of industry experience, I specialize in building responsive, user-centric websites and web applications. I bring a strong command of modern technologies including HTML, CSS, JavaScript, TypeScript, and React.js, enabling me to craft scalable and efficient solutions tailored to client and business needs. My portfolio spans diverse projects, consistently emphasizing clean code, seamless UI/UX, and performance optimization.

WORK EXPERIENCE

March 2025 - Continuous

RMA Metering pvt - Lahore Punjab, Pakistan

Full Stack Developer

- Built scalable, high-performance web apps for industrial and commercial metering solutions using React.js, Next.js, and Electron.js.
- Developed interactive dashboards with real-time data visualization using Redux and custom chart components.
- Wrote type-safe, maintainable codebases using JavaScript and TypeScript across frontend and backend.
- Integrated RESTful APIs to enable seamless device communication, reporting, and metering synchronization.
- Designed polished, responsive UI using Material-UI, aligned with brand and usability standards.
- Implemented secure authentication and role-based access control for multi-department access levels.
- Used Git and GitHub for version control, code reviews, and team collaboration across Pakistan and Germany.
- Collaborated with engineers to align UI/UX with metering protocols and industrial data requirements.
-

PROJECTS

- <https://muzz.com/en-US/>
- <https://www.intagleo.com/>

July 2024 - Feb 2025 (8 months)

Intagleo Systems - Lahore Punjab, Pakistan

Full Stack Developer

- Designed and developed full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), focusing on creating responsive and user-friendly interfaces.
- Implemented robust user authentication and authorization systems using JWT and bcrypt, enhancing application security for signup and signin functionalities.
- Developed and integrated RESTful APIs to facilitate efficient communication between the front-end and back-end, improving data management and overall application performance.
- Worked closely with a cross-functional team, including designers and product managers, to define requirements and deliver features in an agile environment.
- Optimized application performance by identifying bottlenecks and implementing best practices for code efficiency and database management.
- Managed project versions and collaborated with team members using GitHub, ensuring smooth version control and codebase integrity

May 2022 - Jun 2024 (2 years)

Softvalley Solutions- Lahore Punjab, Pakistan

React Js Developer

- Developed dynamic and responsive user interfaces using React.js, JavaScript, and Material-UI.
- Integrated third-party RESTful APIs with Axios and Fetch to enable real-time features.
- Worked on eCommerce profile-based websites with functionalities like product management and secure checkout.
- Utilized Redux for efficient state management across complex components.
- Ensured mobile-first, cross-browser compatibility through responsive design techniques.
- Optimized API performance with caching strategies and robust error handling.
- Collaborated with cross-functional teams to align UI/UX designs with development goals.
- Managed source control using Git and GitHub, participating in code reviews and versioning best practices.
